COLLECTIVE AGREEMENT FOR THE BURG CLOTHING FACTORY (19 pp; [REDACTED])

25X1A

25X1X

This undated photostated document is a collective agreement for the people-owned clothing factory in Burg. The first page is a preface to the agreement which calls on all the employees to fight for the preservation of peace because of the serious and imminent threat to world peace by the Western Powers under the leadership of the American monopolistic capitalists. Therefore the Five-Year Plan production quota must be filled at all costs. The second page states that the Burg factory during 1951 must increase its gross production by 161.8%, its goods production by 161%, its productivity by 70%, and must reduce its production costs by 5.2%. The next two pages list the quotas of ready made articles to be produced by the individual work brigades from July to December 1951. Here it is interesting to note the large percentage of uniforms of policemen and railroad officials as compared to civilian clothes. The remainder of the document are detailed provisions of the collective agreement which include: work requirements, wages, training, work norms, overtime payments, salaries, and social insurance.
